

Join our team

innovative – reliable – flexible – competent

ACST is the leading European supplier of high-power frequency multipliers and THz sources. With 15 years of experience in terahertz solutions, we are a strong partner in the field of Radioastronomy, communications, and scientific instrumentation, but also for industrial applications like MM/SubMM-Wave imaging for security and non-destructive quality control. Our high-performance products and our wide range from semiconductor components over MM-Wave and THz modules up to THz sources and full systems serve the demand in scientific research, laboratory instrumentation, industry, security, and space.

Are you our new RF-Engineer (m/f/d)?

If you...

- feeling confident in managing projects
- be qualified for development, prototype assembly and testing of microwave and MM/Wave MMIC-based metallic modules (frequency amplifiers, transceivers, radars, ...)
- would like to be the coordinator for our external partners and colleagues
- have fun while characterize MM-Wave and THz modules
- like to be responsible for internal reports and documentation
- are able to coordinate internal topics and processes
- are interested in optimizing and supervising our processes
- have experience about PCB design and assembly
- finished your university/master/PhD degree or have working experience in: electrical engineering, microwave electronics, mechatronics, industrial engineering and comparable fields
- speaking fluent English and German
- are willing to travel to international project meetings from time to time

... we look forward to your application!

Why ACST, what do we offer you?

- Become part of a lively international community pioneering THz technology
- You are important to us. ACST allows you your individual self-realization and development with flat hierarchies
- Flexible working hours that improve your work-life balance
- Once a year we ask about your motivation and satisfaction and reward the successful cooperation with our bonus system
- Employer-funded pension that is managed by competent external contacts
- Experience of a warm welcome in a multicultural family team that also likes to celebrate together in our company garden and other events
- our company garden with numerous quiet seating areas, which invites you to relax during the lunch break, to have a barbecue together or for any conversations
- Direct traffic connection to the motorway – depending on where you live, there are usually short ways and no big city traffic
- An exciting workspace with diverse areas of responsibility
- Company holidays between Christmas and New Year's Day
- Individual working hour models (part-time/full-time)
- So much more, but last but not least... ACST has been around for over 15 years, nevertheless and even because of this, we warmly welcome you to our constantly growing team, we are looking forward to your ideas and creative mind

Please send us your complete application documents by email and be sure to let us know what we shouldn't miss from you.
